Resources & Actions

Context applied

Required **Strength***

| Sensitive Data Access | > | Configured Label on Site Specific Sharepoint Sites | > | Phishing-Resistant MFA + compliant device |

Capabilities & Example Scenarios 💡

Authentication Context: when and where such access will be enforced.

Authentication Strength: the required combinations of authentication methods.

Context and strength can be used together or separately depending on the scenario.

*Requirements for access 💡

Recommendations to utilize for increased security. Use independently or together.

- Authentication Strength
- Require device to be marked as compliant
- Session: Sign-in Frequency
